CMS/Plugin Upgrades

Quick Restore

- Our security monitors your site and reports changes to the WordPress filesystem and database that might indicate a compromise. Our security software for WordPress also works to detect bots and other attempts to search vulnerabilities.
- Help prevent Denial of Service attacks and stop attacks because of plugin vulnerabilities, weak passwords and obsolete software as well as helping to stop unwittingly distributing malicious code for the cyber criminals
- Our security software hides common WordPress security vulnerabilities, preventing attackers from learning too much about your site and away from sensitive areas like your site's login, admin

DON'T WASTE TIME - GET STARTED NOW 1-800-257-9679
